Office Action Summary	Application No. 10/803,556	Applicant(s) NELSON ET AL.	
	Examiner Tu Ba Hoang	Art Unit 2832	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Applicant's election without traverse of group II, claims 31-33 in the reply filed on October 16, 2006 is acknowledged.

Claims 1-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no as noted. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 31-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 31, there is insufficient antecedent basis for "the foregoing sensing materials" recited at line 5 in the claim (also note in claim 32). Also there is no indication that the sensing material comprises any of the aluminide or silicide, therefore the recitation of "aluminide or silicide of the sensing material" appeared at lines 7-8 renders the claim indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 31 is rejected under 35 U.S.C. 102(b) as being anticipated by Gerblinger et al (US 5,430,428) cited by the Applicants. Gerblinger et al shows a planar temperature sensor (Figures 1-2 and also see claim 1) comprising: a substrate S; a sensing material or resistive material DS disposed on the substrate, wherein the sensing material is selected from the group consisting of platinum a protective coating or passivating layer disposed on at least a portion of the sensing material (as set forth at column 3, lines 8-10 and 20-21; and column 4, claim 1), wherein the protective coating comprises at least a silicide (as set forth at column 3, line 1 and at column 4, claim 3).

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not suggest the use of yttrium, zirconium as the additional material for the protective coating and such a thickness of about 2 nm to about 20 nm as recited in claims 32 and 33 .

Claims 32-33 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Lin et al (US 6,862,919).
